

SafePost 4000

Product Information

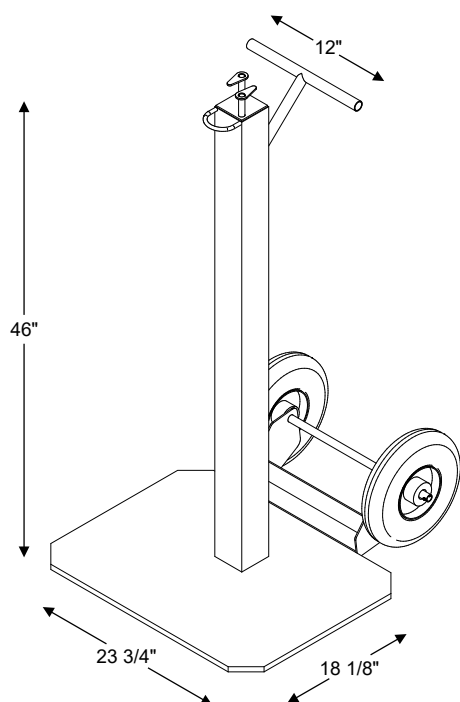

SafePost 4000 is our new hybrid EndPost. This stanchion serves as both a guide and a hooking station. These heavy-duty industrial grade posts are designed for effective crowd control and public guidance at the highest quality. These posts can be used in combination with our SafeBox and SafeGuide system to direct traffic, form lines or block off restricted areas.

Includes

- (1) Powder coated carbon steel frame
- 10-inch wheels

Features

- Heavy-duty design stands upright even in windy conditions. "Tested in Artic conditions".
- Choice of yellow or black finish. Yellow is the standard color.
- Optional reflective safety tape provides increased visibility.
- System is completely welded. No assembly required.
