

SafeGuide

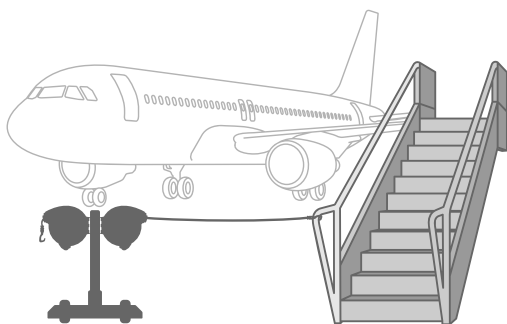

User Guide

1. Transport the SafeGuide by tilting at a 45 degree angle back on its wheels and pushing it towards its destination. Do not pull the SafeGuide.

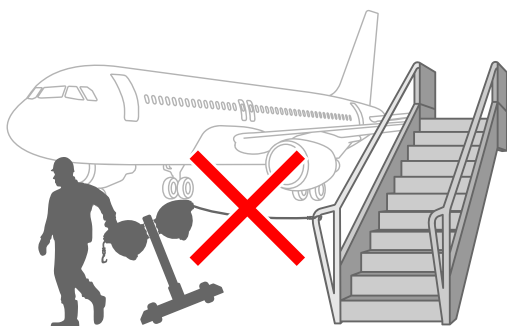

2. Pull the rope out with gentle with even resistance.

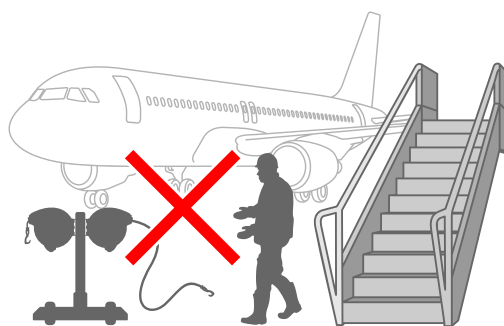

3. Use the hook to secure the rope end to a stationary object to create a temporary barrier.

4. When finished, hold the rope end during retraction with gentle, even resistance.

5. DO NOT drag the SafeGuide after securing the rope end.

6. DO NOT release the rope end with unassisted retraction. DO NOT drop the rope end.
